Re: Office Action Summary dated 10/14/05 Appl. No. 10/624969

Attn: Sameer Gokhale

Dear Sameer Gokhale:

In response to your office action summary of October 14, 2005, I submit the enclosed modified patent application and response to references cited in the summary. The modified patent application reflects three changes:

- A. The permanent resident address of the applicant has been changed although the mailing address remains the same.
- B. With respect to FIG. 10 being objected to as "not a drawing", the figure has been deemed unnecessary to presenting preferred embodiments and principle objectives of this invention and has been removed from the modified application along with all references to it in the specification.
- C. With regard to the rejected claims 1 - 8, the claims have been rewritten to comply with the requirements of 35 U.S.C. 112 and have been included in the modified application replacing the rejected claims.

The citation of previous art concerning three patents of record have been reviewed in comparison with the preferred embodiments and principle objectives of the Computer Program Operation Interface with the findings documented in the enclosed "Evidenciary Argument for Unique Art" Based on the modified

application and comparison to previous art I request that you reevaluate my patent application for the Computer Program Operation Interface and find it to be unique and patentable art.

Sincerely,

A handwritten signature in cursive script, reading "Stanley A. Peickert". The signature is written in dark ink and is positioned above the printed name.

Stanley A. Peickert, Inventor
